FOR IMMEDIATE RELEASE

Enterprise Business Applications and ERP Consulting Firm Expects 2009 to be a Banner Year ENTAP Wins Industry Awards, Adds New Clients and Expands IT Consulting Team

INDIANAPOLIS (September 17, 2009) – ENTAP Inc., one of the industry's most experienced IT consulting and outsourcing firms specializing in enterprise business applications integration and enterprise resource planning (ERP) solutions, today announces projections that 2009 will be a record year. The company recently won several industry awards for its significant growth and innovation, including the highly respected *Indiana Companies to Watch* award. In 2009, ENTAP also added several projects for high-profile clients including Future Farmers of America and the State of Indiana. Additionally, revenue is projected to increase 100 percent from the previous year, particularly in the areas of enterprise business applications and systems consulting, ERP consulting and Oracle PeopleSoft training and support. ENTAP plans to expand its IT consulting and engineering teams to better meet the needs of its growing customer base.

"I attribute our growth and success this year to a resurgent demand among executives of large organizations to fully utilize their ERP systems. Managers of IT departments increasingly are being challenged to leverage their enterprise business applications to improve performance across human resource, financial/accounting, supply chain and customer relationship management (CRM) functions," commented president and chief executive officer Tracy E. Barnes.

As part of its growth strategy, the firm is actively recruiting experienced Oracle PeopleSoft consultants, ERP experts and business analysts to accommodate its expanding client list. "ENTAP's IT consultants help our clients unleash the potential of ERP solutions such as Oracle PeopleSoft Enterprise, Oracle e-Business Suite and Microsoft Dynamics by aligning back-office applications with corporate strategy," Barnes stated. "This results in greater efficiencies, improved productivity and increased profitability while maximizing the lifecycle value of our clients' technology assets."

ENTAP has consistently grown 100 percent year-over-year since its formation in 2004. This, in large part, is due to the company's ability to continually attract large clients from the state and Federal government, financial services, commercial/retail, higher education and public sectors.

About ENTAP
